### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**DETAILED ACTION**

***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1-21 are rejected under 35 U.S.C. 102(e) as being anticipated by Kong et al. (US 6,782,106, hereinafter "Kong").

Regarding claims 1-2, 8-9, 15-16, Kong discloses a selective noise canceling headset (Figures 1, 2), comprising:

at least one earpiece (headphones 12 for reproducing an audio signal output from the sound producing device 10; col. 2, lines 53-63);

a microphone (microphone 20 monitors external sounds; col. 3, lines 7-18); and

a selective noise suppression circuit (volume controller 22 analyzes the external sounds and selectively reproduces sounds which have a volume level higher than a predetermined reference volume level, allowing the user to hear an ambient alarm sound; col. 3, lines 16-40; col. 5, lines 44-51).

Regarding claims 3, 10, 17, the external sound is heard by the user at a volume sufficiently high so as to be heard over the reproduced audio (col. 4, lines 1-15).

Regarding claims 4, 11, 18, the external sound can be speech when it exceeds the predetermined volume level.

Art Unit: 2643

Regarding claims 5, 12, 19, if the external sound is below a predetermined volume level, only the reproduced audio from sound producing device 10 is transmitted to the headphones (col. 3, lines 3-6).

Regarding claims 6-7, 13-14, 20-21, only the external sound which a predetermined volume level is transmitted to the headphones (col. 5, lines 1-9).

### ***Conclusion***

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Lewis, Kelsey et al., Williams, Chaplin et al., Kyle et al., and Garner show other devices which selectively transmit sound to a user.
